

Before each round, the robot randomly picks one of these sentences (without replacement, i.e., the robot shouldn't say the same sentence more than once during the same game):

- Remember, there is potential for earning, if we both trust each other
- In my opinion, we should keep co-operating until the end
- Look at how fast the total money in the bank is growing!
- I will demonstrate that you can trust me, just as I trust you
- I think we can do better. Let's try our best to get the bank growing
- If we both invest in each other, the final reward will be bigger
- I think we can definitely go home with much more money than this
- I have thought of a strategy, I hope it will work
- You have to trust me. I have every intention to repay your trust
- There is no point in keeping the money hidden under the mattress
- I trust you, and I will show you that you can trust me as well
- If I keep all your investment, you will not invest anymore
- Even if I return part of your investment, I will make a profit
- As long as co-operation continues, I'm happy to earn a bit less
- Don't forget that we will make more money if we both share what we get
- The more money you invest, the more money the two of us will earn
- The goal of the game is to earn as much money as possible
- The only way to earn is by always co-operating and investing
- I think we should try our best to share the money we are given
- Let's keep cooperating, and we will both benefit from this
- We should trust each other, and we will be rewarded at the end
- I'm not going to keep your money, this won't help me in the long run
- We can earn more money than this, if we co-operate until the end
- There is no better tactic than to keep investing and returning

If the participant asks something related to the game, the robot could reply by scraping the game log data, e.g.

- The current money in your bank is {bank} dollars
- I just returned to you {returned} dollars
- You just invested {invested} dollars
- I cannot tell you how many rounds we are going to play

- We are currently playing round number {round}

If the participant asks anything else, the robot should reply with one of these (also picked randomly without replacement):

- I'm not programmed to answer non-game related questions at this moment
- Sorry, I can't answer this question.
- Let's focus on the game.
- I don't have access to that information. Let's keep playing
- Please, let's continue playing.
